

Maraysse

Rosans - Valdoule

Un beau panorama à contempler (CCSB)

With its typical steep rock overlooking the Oule valley, Maraysse's hike is short but very technical. Only well trained hikers may take this trail which, on the ridges, requires agility and ease in a vertical environment.

Cities : 1. Valdoule
2. Ribeyret

Altimetric profile

Min elevation 1148 m Max elevation 1549 m

1. At the sign "Les Garenses" take the left path which cuts a winding track, to reach the Col du Casset (1242 m).
2. At the pass (picnic table), follow the Maraysse ridge, to the right, on a narrow and technical path. Halfway on the ridge, leave the ridge and take a cross path along the south side: be cautious and stay focused. You'll then reach the top of Maraysse (1567 m) with its cross. Take, on the southwest side, a very steep passage (remain attentive). At the foot of this corridor, the well-marked path continues to the west under the cliff. The path joins a grassy ledge and the ridge (1504 m).
3. The trail goes down quickly to the right through a clearing, then it enters the beech grove (check and spot well the path that runs down between the trees and is difficult to see). Steep at first, the trail becomes easier up to the pine forest (look out for the markings).
4. At an intersection (1210 m), you'll meet a well-marked path that you'll follow to the right until you reach a forest track (at a bend). Follow it, on the left, downhill, to go back to your starting point.

On your path...

Arche de Maraysse (A)

Located on the Maraysse crest hike, a small arch is located below the path. This geological formation both entertains and questions, but above all impresses with its singularity.

The mountain of Maraysse (B)

The Montagne de Maraysse, located in the Oule valley, seems inaccessible at first glance. However, a technical path allows one to get there and thus offers a splendid panorama on the valleys of Oule and Rosans. Further, you can admire the mountains of Lure, The Mont Ventoux as well as the Dévoluy massif.
